## AP-1 > wordsCount

[prev](#) | [next](#) | [chance](#)

Given an array of strings, return the count of the number of strings with the given length.

wordsCount(["a", "bb", "b", "ccc"], 1) → 2

wordsCount(["a", "bb", "b", "ccc"], 3) → 1

wordsCount(["a", "bb", "b", "ccc"], 4) → 0

**Go**

...Save, Compile, Run (ctrl-enter)

```
public int wordsCount(String[] words, int len) {  
|  
}  
}
```
